At the heart of Lens 2 lies its multi-zone sensor matrix — a groundbreaking system that intelligently detects movement and ambient light, adapting in real time to your workspace. Each zone is optimized independently to provide consistent illumination across the day, reducing strain, enhancing concentration, and minimizing unnecessary energy use. It's lighting that thinks, responds, and supports you.

ILDLD is proud to offer the Lens 2 range as part of our ongoing commitment to smarter, sustainable workspaces. This innovation by Molto Luce is now available through ILDL — and ready to redefine how your teams experience light.
