THE LIGHT EDIT

VOL 25. ISSUE 01

A FINER DEGREE OF PRECISION ARRIVES IN INDIA

Welcoming *Duragreen* to the ILDL Family

At ILDL, we represent brands that bring clarity of thought to lighting design. Duragreen's approach mirrors our own: let the architecture speak and light serve.

Their miniature luminaires fill a gap we have long looked to address for premium residential and commercial spaces - invisible performance at the highest level.

THE DURAGREEN DIFFERENCE

THE DURAGREEN DIFFERENCE

The *smaller* the fixture, the *more* the *architecture* gets to speak

Duragreen's miniature luminaires are built to recede from view and perform without compromise. Less ceiling clutter, more design clarity. Precise, high-performance illumination that disappears into the architecture.

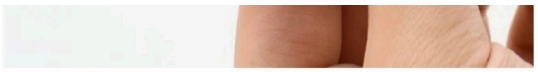

DISCOVER DURAGREEN →

HOW THE DURAGREEN RANGE ASSISTS ARCHITECTURE

The Duragreen *Advantage*

Small aperture, No compromise

A consistent LED engine and optical platform runs across the full range, maintaining coherent colour temperature, CRI, and beam distribution from zone to zone. One hardware footprint for every lighting scene.

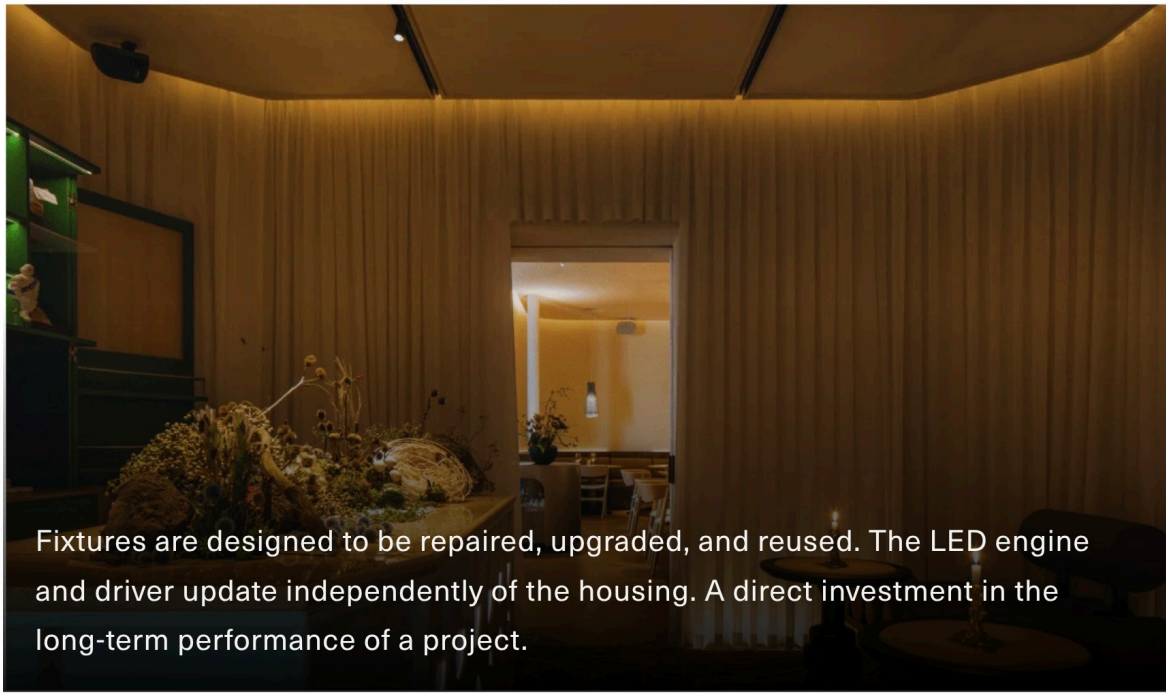

One frame, Full flexibility

System 57 sets a single cut-out standard across an entire project. Modules swap for different beam angles, output levels, or fixture types without ceiling rework and visual clutter. Specify once and it adapts freely.

SUSTAINABILITY AND INNOVATION

Built for circular use

Fixtures are designed to be repaired, upgraded, and reused. The LED engine and driver update independently of the housing. A direct investment in the long-term performance of a project.

Transform your space

The fixture disappears. The light does not. Miniature luminaires remove the distraction, so the light does its job without the hardware getting in the way -

coupled with powerful and precise illumination.
